H2020 (SC6-co-creation-2016-2): German IT company is looking for public administrations and IT service companies for successful H2020 project

If you would like more information about the profile please click Request More Information. You will be directed to a new page where you will need to provide some information about yourself or your business cooperation needs and submit your expression of interest in the profile. A Network Partner will then contact you to discuss your interest in greater detail.

Details
Title: H2020 (SC6-co-creation-2016-2): German IT company is looking for public administrations and IT service companies for successful H2020 project
POD Reference: RDDE2017518001
Summary: A German IT company is participating in a successfully funded Horizon 2020 project on the Once-Only Principle (OOP) in public administrations. The project has already started, but is looking for additional partners to be integrated in the wider project community. The project is looking for public administrations willing to showcase their solutions or to learn from successful best practices and for IT service companies that can share experiences on chances and barriers to OOP.
Description: Many public administrations require their citizens to provide the same information every time they need administrative services. The Once-Only Principle (OOP) seeks to make sure that public administrations can re-use citizens' data, while respecting privacy and data protection rules, and thus make life easier for citizens by avoiding the need for continued data entry.

The aim of this Horizon 2020-Funded research project is to bring together practitioners from public administrations, researchers and the interested public in order to jointly advance the discussion about the Once-Only Principle. The project will contribute to effective knowledge transfer, knowledge sharing and development of future solutions based on the OOP.

The consortium currently consists of two IT companies, a university, a research centre and a think tank. As part of the project, a wider Stakeholder Community is currently being established. This project is seeking the following additional community partners to take part in this stakeholder community and thus contribute to the expert discussion on the Once-Only Principle:

1. Public administrations that want to highlight best-practice cases in implementing or relying on the OOP.
2. IT service companies that want to discuss opportunities and barriers to implementing the OOP.

Partners in the stakeholder community will not receive any direct funding, but will have their travel costs reimbursed if they participate in project workshops and events across Europe.

Partners in the stakeholder community also get access to restricted areas of the project website, where they can find a database of OOP cases and online discussions.

The projects run under the Horizon 2020 programme, and has a duration of 24 months.

As the project is already funded, there is no call deadline. The deadline for Expressions of Interest is the end of the project duration, i.e. October 2018.

NCP Flanders
Horizon 2020 guidance

The call for the Horizon 2020 programme contains many of its partners. Excellent science, industrial leadership and societal challenges. Next to other programmes, the Horizon 2020 programme has a strong emphasis on supporting innovation and entrepreneurship.

Other EU funding

Besides Horizon 2020, there are several other relevant funding programmes managed by several agencies and directorates of the European Commission.

About NCP Flanders

NCP Flanders offers support to all programme officers of the Horizon 2020 call and provides information on relevant events, activities, and news.
